A Day in a Life of the Lagoon with ORCA and MRC

This past Wednesday, ORCA spoke to St. Mark's 1st - 6th Grade students about **A Day in the Life of the Lagoon**: a community-based, experiential research program designed to have students, teachers, community volunteers and environmental experts collaborate in the collection of water quality data and biological inventories along the Indian River Lagoon.

On Monday, Sept. 12th, students will be partnering with ORCA to learn how to:

- Perform a chemical analysis
- Perform a biological survey
- Perform a tide measurement
- Create a site description
- Document all data.

Parents can follow and get updates on their students' Marine Science & STEAM activities during the school year via Class Dojo. More information will be sent home in students' backpacks. Download the app for iPhones and Android phones.
